

# **Product information**

# VELUX INTEGRA® Solar centre-pivot pine roof window GGL

# **Product description**

- No wiring photovoltaic solar cell on the window top cover powers the window operator
- Simple, convenient wall switch
- · Pre-installed hidden window operator
- Built-in rain sensor ensures that the window closes automatically in case of rain
- Easy installation of solar powered decoration and sunscreening products
- Wall switches use secure radio frequency (RF) technology to operate individual or groups of roof windows, blinds, awnings and roller shutters from anywhere in the building
- Rechargeable battery charged by the PV solar cell
- Safety circuit prevents battery from total discharge
- Ventilation flap allows fresh air to circulate even when your window is closed
- Integrated dust and insect filter

## Roof pitch

• Can be installed in roof pitches between 15° and 90°

#### Materials

- High quality natural pinewood coated with impregnation and layers of water-based acrylic white paint or clear lacquer
- VELUX ThermoTechnology™ insulation ensures an excellent energy performance
- Maintenance-free exterior covers in lacquered aluminium, copper or zinc

## Certifications

The VELUX product factories guarantee quality systems implementation process and environmental management systems through appropriate accreditations ISO 9001 and ISO 14001

EUTR

In compliance with the EU Timber Regulation (EUTR), EU regulation 995/2010

REACH

We are aware of the REACH regulation and acknowledge the obligations. No products are obliged to be registered in accordance to REACH and none of our products contains any Substances of Very High Concern.

# Recommended application

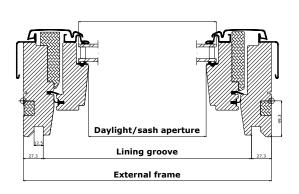

VELUX INTEGRA® Solar roof windows are

- perfect for replacement of old roof windows as no wiring is required
- ideal for out-of-reach situations or when extra convenience is needed

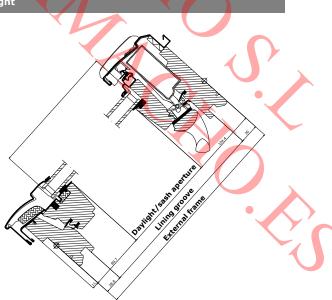

#### VELUX INTEGRA® wall switch ensures

- a perfect level of energy efficiency and comfort
- easy ventilation and better indoor air quality

# Glazing features

		70	68	60	66
*	Heat insulation Low energy glazing provides reduced heat loss through the window and enhanced indoor comfort.	•	•••	••	•••
131	Solar gain In the wintertime, the heat from the sun entering through the windows is a usable solar gain.	•••	••	•	••
3	Solar protection In warm climates and in rooms with large window areas, a sun protective coating provides a better indoor climate during summer periods. Alternatively, exterior sunscreening can be installed.			•••	
	Sound insulation A combination of laminated glass and optimal glass thickness provides better sound insulation. Frame/sash construction and gaskets are equally important.	••	••	•••	•••
3	Security Thicker laminated inner glass pane designed to increase resistance to manual attack (burglary).	•	•	•	•
	Energy balance The energy balance represents the ability of the roof window to utilise the passive solar gain and keep in the heat during winter and its ability to protect against the risk of overheating during summer. Sunscreening products can further improve indoor summer comfort.			/	/
<b>D</b> ,	Safety Laminated inner glass is designed to hold the fragments together if the glass breaks. We recommend that you consider using glass units with laminated glass on the inside for windows placed above areas where people sleep, play or work.	10		<b>✓</b>	<b>✓</b>
****	Outside strength Toughened outer glass pane makes your glazing more resistant to hail, heavy wind and snow loads.			***	<b>✓</b>
	<b>Delayed fading of materials</b> Inner laminated glass protects materials behind the glass against UV radiation and therefore delays fading of the materials.	<b>\</b>	V.		<b>&gt;</b>
(d)	Rain noise reduction The combination of laminated glass and extra thick glass helps provide a significant, audible reduction of rainfall sound. Frame/sash construction and gaskets are equally important.			1	\$
	Easy-to-clean The easy-to-clean coating minimises the cleaning frequency of the outer glass pane and gives you a clearer view in case of rain.				<b>/</b>
	Anti-dew The anti-dew coating significantly reduces the days with dew on the outer glass pane and thus gives you a clear view.

# Visible features

When operated with the control pad, the window opens variably up to 200 mm. The window can also be opened manually, eg in case of power failure

Data plate

Each VELUX roof window has a unique data plate showing type, size, variant etc of the window. QR code with link to local mobile website

3 Lock casing

Electro-galvanised steel

Ventilation flap with control bar

The ventilation flap is designed with a control bar to allow for manual operation

**5** Excellent insulation

Elements of expanded polystyrene ensure an excellent energy performance

6 Barrel bolt

The roof window can be rotated and secured in position with a barrel bolt to ensure safe and easy cleaning of the outside pane from the inside

Brackets for accessories

With the pre-installed VELUX Pick&Click!™ brackets, installation of solar powered blinds could not be easier

8 Wall switch

VELUX INTEGRA® wall switch for simple, convenient operation of the window.

# Visible features

# Cleaning and maintenance

To clean the outer pane from the inside, rotate sash and secure in cleaning position with barrel bolt.

VELUX repair and maintenance kits are available.

# **Exterior covers**

Material	NCS standard colour	RAL nearest standard colour

Available in manual and solar powered versions

Available in manual version

The mains and solar powered versions are part of the VELUX INTEGRA® product

# Flashings and installation products

- Flashings:

   ED- for single installation

   EB- for twin installation
- EK- for combi installation

Available for standard and recessed installation

- Installation products:
  Installation set BDX 2000 (incl. BFX)
  Underfelt collar BFX 1000 incl. transverse
- drainage gutter
   Vapour barrier collar BBX 0000
   Linings LS- (incl. BBX)

# Control options

**Upgrade your system**VELUX INTEGRA® Active sensor system monitors and receives data from the outside solar and temperature sensors and activates blinds and shutters when necessary. In this way, the system improves thermal comfort while also reducing cooling costs in summer and heating costs in winter.

# Technical information

_	
Material and colour	Roof window: See brochure or price list for variants.
	Wall Switch: ABS, white (NCS S 1000-N).
	Window operator: PBT with glass fibre, black (NCS S 9000-N) and stainless steel chain.
	Rain sensor: PC with glass fibre, black (NCS S 9000-N)
Size and weight	Size of product including packaging: The same as equivalent manually operated roof window.
	Weight: Approx 3 kg more than equivalent manually operated roof window.
	Wall switch: 82 x 82 x 17 mm (W x H x D), 114 g (with batteries 125 g).
Installation and use	The window is classified in protection class IP44.
	The window operator hidden in the top cover and functions at temperatures between -10°C and +60°C.
	The wall switch is for indoor use, maximum ambient temperature 45°C.
	Radio frequency range: 300 m free field. Depending on building construction, the indoor range is approximately 30 m.
	Installation in rooms with a high level of humidity must comply with relevant regulations (contact a qualified
	electrician if necessary).
Window opening	Max 200 mm within 35 seconds.
	Due to a shorter chain, small/special window sizes have a different window opening.
	Window opening for sizes01 and02 = 135 mm. Window opening for sizes25 and27 = 38 mm.
Power consumption	Window operator: 90 uA standby, supplied by the battery.
	Battery: High performance battery, 10.8 V d.c., NiMH, type VELUX. Recharged continuously by the solar cell. A fully charged battery allows up to 300 operations without recharging.
	Expected battery lifetime of the solar powered window operator: Approximately 10 years.
	Solar cell: Charge current 0-80 mA (photovoltaic), dependent on the weather conditions.
	Wall Switch: 2 x alkaline AAA (1.5 V) batteries. Expected battery lifetime: Approximately 2 years.
Motor capacity	Traction capacity: Min 225 N
	Pressure capacity: Min 150 N
Compatibility	The window is based on radio frequency (RF) technology, 868 MHz range, and is compatible with other products with the io-homecontrol® logo.
	Subsequent installation of VELUX INTEGRA® Solar roller shutter SSL or VELUX INTEGRA® Solar awning blind MSL is
	possible if the window size code is MK, PK, SK or UK Only these sizes have enough room for the solar cell on the roller shutter top casing or the awning blind top cover.
	Installation of VELUX INTEGRA® Solar roller shutter SSL or VELUX INTEGRA® Solar awning blind MSL requires adaptor
	plate kit ZOZ 213. The kit must be purchased separately.
	Please note that the roller shutter must be io-homecontrol® labelled to be compatible with the VELUX INTEGRA® Solar roof window. Interior decoration and sunscreening products can be fitted to VELUX INTEGRA® Solar GGL and GGU.
	Please note that if these products are combined with VELUX INTEGRA® Solar roller shutter SSL or VELUX INTEGRA® Solar awning blind MSL, the battery recharging capability of the interior solar decoration and sunscreening products
	will be reduced.
	Connection to non-compatible products may cause damage or malfunction.
CE marking	The window is CE-marked to indicate that it is in accordance with the EU directives CPD, LVD, MD, R&TTE and EMC for
•	household, trade and light industry.
Note	This sheet describes the added features of VELUX INTEGRA® Solar roof window GGL compared with manually operated
	VELUX roof window GGL. For further information on the features and specifications of GGL, please see the main VELUX brochure.
